## EXPERIENCE

### Full-Stack Developer

*Inflexion Analytics, Bangalore, IN*

*May 2023 – April 2025*

- Built and deployed **PBI Flow**, a full-stack Power BI automation platform using **React.js**, **Node.js**, and **PostgreSQL**, automated parallel scheduling for **1000+** reports.
- Integrated **Power BI APIs** for dynamic exports (PDF/PPT) with cloud (GCS), reducing manual effort by **60%**.
- Developed **Report Exporter** with email delivery using **SendGrid** and **Outlook APIs**, achieved a **40%** reduction in delivery errors through enhanced retry logic for rate-limited jobs.
- Accelerated report generation by **35%** by optimizing the **Report Render** engine.
- Automated **CI/CD pipelines** using **Google Cloud Build** and **YAML**, reducing release time by **50%** and minimizing production downtime.

## PROJECT

### AI Creator Platform

Sept 2025 - Nov 2025

*Technologies: React, JavaScript, NextJs, Convex, Generative AI, Clerk Authentication*

- Built a full-stack **AI-powered** content creation platform enabling users to **generate**, **edit**, and **publish SEO-ready** blogs using real-time **generative AI**.
- Integrated a custom rich-text editor with advanced formatting, **AI-based** content enhancement, and **image upload/optimization** using **ImageKit**.
- Developed creator **profiles**, **social interactions** (likes, comments, follow system), and secure authentication flows using **Clerk** and **Convex** backend.

### E-Commerce Backend

July 2025

*Technologies: Node.js, JavaScript, MongoDB, REST APIs, Git,*

- Designed and built backend services for an e-commerce platform, focusing on **JWT authentication**, user registration/login, and secure API endpoints.
- Implemented core features such as **Add to Cart**, dynamic **checkout logic**, and **subtotal calculation** via REST APIs.
- Followed modular architecture and used Git for version control and collaboration.
